**To the VLDB 2027 Shadow PC Chairs:**

**Support letter for Ms Yanlin Qi for the Shadow PC**

This letter is in very strong support of the application of my 2nd-year PhD student, Yanlin Qi, for the VLDB 2027 Shadow PC. I am providing this recommendation based upon my qualifications and expertise in the field of Computer Science (please see below for my short bio), to highlight the extraordinary accomplishments in her academic life so far, and to attest to the recognition of Yanlin's work in the field.

Based on my professional experience, I can say that the quality and scope of Yanlin's work is of the highest caliber among researchers of her level worldwide. She has contributed original research to data management and data analytics. Her work has been published in the top international journals (e.g., PVLDB, TOIS) and conferences (e.g., NeurIPS), including 2 papers in PVLDB volume 18, and a 3rd one in PVLDB volume 19.

Yanlin is currently working in the broader area of data management, with research interests including vector search, indexing, retrieval, and system support for large-scale machine learning / LLM workloads. Her work is closely connected to the data management community, and she has already demonstrated strong research potential through her PVLDB publications. In these publications, Yanlin addressed problems on product quantization codebook compression, iterative data selection for efficient LLM instruction tuning, and learned indexes. These works reflect both technical depth and a growing engagement with core data management problems and methodologies.

Beyond her publication record, I believe Yanlin would benefit greatly from participating in the VLDB Shadow PC. She is serious, responsible, and intellectually curious, and I am confident that she will approach the reviewing process with care and professionalism. I also believe that the experience of writing rigorous and constructive reviews for VLDB submissions would be highly valuable for her development as an independent researcher in the data management community.

In conclusion, Yanlin is a very intelligent individual. During her very first research steps, she has demonstrated an unusual maturity for her academic age. Yanlin is a student of extraordinary ability and potential, and a very promising young researcher. I have no doubt that her participation in the Shadow PC will be beneficial, allowing her to gain invaluable experience in the review and program committee process of a top conference.

It is on the basis of the above that I enthusiastically and without any hesitation that I recommend Yanlin for the VLDB 2027 Shadow PC.

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

Distinguished Prof. [Themis Palpanas](#)  
[ACM](#) Fellow  
Senior Fellow of [French University Institute \(IUF\)](#)  
Director of [LIPADE](#) (Computer Science Dept.)

*Themis Palpanas Short Bio:*

*I am an ACM (Association for Computing Machinery) Fellow, a distinction that recognizes the top 1% of members worldwide across all areas of computer science for their outstanding accomplishments, a Senior Fellow of the French University Institute (IUF), a distinction that recognizes the top 2% of university professors across all academic disciplines in France, and Distinguished Professor of Computer Science at the University of Paris Cité (France), where I am director of the data management group, diNo. I was the founding director of the Data Intelligence Institute of Paris (diiP). I have received the BS degree from the National Technical University of Athens, Greece, and the MSc and PhD degrees from the University of Toronto (1997–2002). I have previously held positions at the University of California, Riverside, University of Trento, and at IBM T.J. Watson Research Center, and visited the National University of Singapore (NUS), Microsoft Research, and the IBM Almaden Research Center. My research interests include problems related to data science (big data analytics and machine learning applications). I am the author of 10 US patents, 1 European patent, and 4 French patents. I am the recipient of 3 Best Paper awards, 1 Best Runner-up Demo award, and the IBM Shared University Research (SUR) Award. My service includes the VLDB Endowment Board of Trustees (2018–2023), Editor-in-Chief for PVLDB Journal (2024–2025) and BDR Journal (2016–2021), PC Chair for IEEE BigData 2023 and ICDE 2023 Industry and Applications Track, General Chair for VLDB 2013, Associate Editor for the TKDE Journal (2014–2020), and Research PC Vice Chair for ICDE 2020.*
